

# MAGIC SCRATCH

The subtle and innovative structure of the new anti-slip mat MAGIC SCRATCH looks like a finely ground metal surface. Even the first impression suggests that lines interrupted at a steep angle intersect at irregular intervals. The resulting light reflections create a modern and metallic effect. The valuable feel can be "grasped". The MAGIC SCRATCH series with its non-slip surface is not only an experience to look at and feel, but also promises to protect the floor.

The MAGIC SCRATCH series can be used as far as the eye can see. The series finds its place not only in the kitchen, but also in the living room or in the bathroom. In conjunction with a cutlery insert with the SCRATCH surface, a homogeneous ensemble is created so that the all-in-one product can be used anywhere. The MAGIC SCRATCH series is now available both as panels in standard dimensions or as cuts for frame systems that are common on the market.

- Food safety according to the European Plastics Regulation (EU) No. 10/2011 and Regulation (EU) No. 1935/2004
- Surface like a finely ground metal surface
- Cool clean Look
- Slip-resistant and noise-insulating
- Flexible use in all common drawer and cabinet types from 250 to 1200 mm wide and 300 to 650 mm deep
- Also available as raw sheets in the maximum format of 1,400 x 2,100 mm
- Serial production possible
- Can be combined with ELCO cutlery inserts with an identical surface

## Delivery programme

Version	Sheet goods
Material	ABS / TPU
Widths	Nominal widths 250 - 1200 mm
Depths	Nominal depths 300 - 650 mm
Strength	1 mm
Special designs	on request

## Colours

Colours	No.
Anthracite	F868
Black	F100
Silver	F867
Other colors	On request
