

# SPRING

The SPRING bath insert is a little all-rounder. Easy to handle and flexible to use. Its closed side view allows independent use in bathroom pull-outs from a cabinet width of 60 cm. With the use of an anti-slip mat, the free space created in larger cabinet widths can be used flexibly for other accessories. The SPRING bath insert can flexibly meet different requirements for vanity units. Its deeper inner sides of the siphon cut-out simultaneously cover the cut edges of the notch of the drawer bottom. With just one item, additional dimensions can be individually fitted from 60 cm car-case width, as the sides are closed.

With an anti-slip mat, which is also included in the range, the free spaces can thus be used for e.g. larger utensils or even towels. A plus point of SPRING is the optimal equipment with compartments and a matching high-quality range of boxes and trays. So everything is at its place. The SPRING series can be individually adapted to the frame systems commonly used on the market and is reliably supplied as a completely finished product.

- Optimum use of the bathroom drawer
- Use of the "second level"
- Modern design, attention to the detail
- Efficient compartment division
- Enclosure of the siphon cut-out
- Optional accessories on boxes and trays
- Anti-slip mat for use of wider drawers
- Easy-to-clean radii
- Flexible use in all common drawer and cupboard types
