Base foot	up to 230 mm	NH 100
Base foot	with fascia lift fitting up to 230 mm	NH 100

Basic drawer NH 170

Basic drawer front NH 220

Organisation drawer NH 60

The built-in oven not only serves its purpose, but also has to serve as storage space for baking trays, grill grates and various other utensils, which have to be removed in a cumbersome manner before they can be put into operation. Conventional pedestal drawers offer only little relief. TOP VOLUME² offers an optimum overview thanks to an integrated organiser drawer. The TOP VOLUME² plinth drawer system puts an end to storage problems around the oven.

Making optimum use of the full plinth space, the system offers precise space for all oven utensils at a height of 17 cm or 22 cm. Baking trays and grids can be stored in a special Orga drawer integrated into the drawer. When the plinth drawer is open, it can simply be moved backwards to reveal the generous storage space underneath: finally, room for cake tins or other utensils. A specially developed panel lift mechanism prevents the plinth panel from dragging on the floor covering when the drawer is pulled out.

- Large-volume storage space
- Additional storage possibilities due to sliding Orga drawer
- Easy to assemble construction
- Anti-slip floor structure
- Optimum adjustability of the plinth panel
- Low storage space requirement
- For all oven cabinets with a plinth height of 100 mm or more
