

WATCH

Especially in the bathroom, there is a need to store different cosmetics and accessories for daily use. If several people or even generations live in one household, well-sorted access to the articles should be ensured, i.e. everything should be in perfect order. In addition, the wellness trend calls for new design approaches. WATCH completely fills the drawers and pull-outs, leaving no room for untidiness. The programme also offers the option of elegantly concealing recesses for the siphon. The programme sets itself apart from other products with two decisive advantages.

In addition to its well thought-out basic layout, it offers maximum flexibility and modernity thanks to an optionally available assortment of coloured boxes and trays. Furthermore, the attachment of a three-quarter tray uses the so-called second level and thus the otherwise unused space of a drawer. The WATCH series can be individually adapted to the drawer systems commonly used on the market and is reliably supplied as a completely finished product.

- Full use of the bathroom drawer
- Use of the second level
- Modern design, attention to detail
- Interesting compartment division
- Edging of the siphon cut-out
- Optional accessories on boxes and trays
- Easy to clean radii
- Flexible use in all common drawer and cabinet types
